

FACET

GEMSTONE

Facet Gemstone delivers secure, compliant document management from anywhere with an internet connection. True Software as a Service (SaaS) built-in-the-cloud productivity tool designed to help small teams manage authoring, review and approval of development documentation with no IT infrastructure.

Features

- Intuitive interface supports document management activities with minimal training/quick implementation
- Validation related documents included
- HTTPS security to ensure encryption across all communication connections.
- Audit trails support 21 CFR Part 11 compliant management of documents and records.
- Standard configuration based on the DIA EDM Reference Model, an industry accepted specification for organizing content
- Browser-based, no downloaded components
- SaaS-based, built in the cloud
- Inexpensive Subscription Model
- Integrated Submission staging and assembly manager
- Automated creation of Submission Tracking report

Benefits

- Simple to use
- Quick to deploy
- Secure
- Compliant
- Built-in industry standards and best practices
- Zero footprint, low maintenance solution minimizes IT support
- 24/7 Global access from any internet connection
- Affordable price point supports low cost development philosophy; No long-term licensing commitment
- Streamlined organization connecting documents to submission planning process
- Proactively manage content to supply publishing vendor or Regulatory Operations team

Simple. Secure. Compliant.
